HOUSE OF SELF ADHESIVE TAPES

## CORRUGATION CONSUMABLES

We are the leading manufacturer and importer for the business outfit in the distribution of Corrugation Printing Consumables.

We mainly market high quality imported products all over India over 50 years. We also have State-of-Art Manufacturing Facility at Vapi, Gujarat – India.

Our customers are the leading Flexo Printers, Offset Printers & Corrugations Consumables all over India & the world.

Our moto is delivering value to our customers by providing World-Class solutions for Corrugation Consumables to save the cost of our customers offering good quality replacements to expensive products in the market.

We keep on manufacturing and sourcing the High Quality products consistently, meeting the customers' ever changing requirements.

### ASTROLONE SHEET / BASE SHEET FOR FILM MAKE UP

It is a plastic sheet which is used to give support to the Stereo/Nylon Flexographic Plate used in the Printing Process. This sheet help to maintain the Stereo/Nylon Plate which results in Long-run of Plates without getting it damaged.

### ASTROLONE SHEET HANG-UP STRIPS

It is used to fix the Astrolone Sheet/Plate to the groove given in the Printing Cylinder. Also it used for hanging the Astrolone Sheet/Plate Make Up on the Rack

### eBak CUSHION FOAM FOR CYLINDER

This is a Cushion Foam used for Flexo Corrugation High-Quality Printing with Open Cell Technology. It saves dot-gain, avoids board-crush, reduces ink consumption & thinner Flexo plates can be used to save the cost.

### VEINED CROSS FIBRE SELF ADHESIVE TAPE

In corrugation printing process it is mainly used to seal the Hang-Up Strips with the Astrolone Sheet.

### DOUBLE SIDED RUBBERISED CLOTH TAPE / STEREO TAPE

It is used to stick the Stereo/Nylon Flexo Plate with the Astrolone Sheet and set it according to the printing job.

### HANG-UP GROOVE FOR RACK

Convenient to storage and take out Astrolone Sheets  
Solid and durable.  
Double-groove to maximize the storage.

### STORAGE RACK FOR FLEXOGRAPHIC PLATES

It is a structure made to store the Flexographic Printing Plates.  
It makes the job easy as Plates are already stored in the rack and ready to use as soon as the old job ends.

### DOUBLE SIDED SPLICING TAPE

It is a pressure sensitive high temperature tissue paper tape used for Splicing/Joining of Paper to Paper. In corrugation line it is used to Splice Paper's Reel to Reel whenever needed.
